DETAILED ACTION

Status of the Rejections pending since the Office action of June 11, 2007

1. All previous rejections are withdrawn.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4, 6, and 25-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1 has the limitation

"... wherein a potential applied to the first and second electrodes passes electrons from the first fluid passage to the second fluid passage through the membrane, ..." [emphasis added].

Membranes and gels used in microfluidic devices are usually non-conductive. In particular, agarose and regenerated cellulose, which appear to be the only specific membrane materials mentioned in Applicant's disclosure, are non-conductive. See page 48 in bioanalytical chemistry by Manz et al. and the top of Table 2 in Temperature Classes of Electrical Insulators by Shimizu Ohta. Additionally, the fluids disclosed by Applicant, such as buffers, which are to be in the fluid passages, do not conduct electrons, but ions. Using Applicant's disclosure and current knowledge in the art, one with ordinary skill in the art would not know how to conduct electrons from the first electrode through the first fluid passage, through the membrane, and through the second fluid passage to the second electrode.

Claims 2-4, 6, and 25-29 depend directly or indirectly from claim 1 and thus are also not enabled for the same reason.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALEX NOGUEROLA whose telephone number is (571) 272-1343. The examiner can normally be reached on M-F 8:30 - 5:00.
